prospectus

This half term's POWer Project is:

'Investigating our local area'

Develop your creativity:

- Design your perfect Wylde Green – which human and physical features would it have?
- Create a model of the one thing you would like to add to Wylde Green to improve it.
- Create a picture using any media of a Sutton Coldfield scene.

Extend your research skills:

- Be a sat nav! Give directions between two places in our area.
- Create a map of the local area using a key.
- Create an information leaflet about Wylde Green for visitors or someone moving into the area.

Choose projects to achieve your POWer Points. You can add with your own ideas too!

Explore your mathematical/ entrepreneurial skills:

- Can you find out how many different places you can get a train or bus to from Wylde Green? Where is the furthest?
- Make a survey of the different types of shops/ restaurants in Wylde Green. Show your results in a table or bar chart.

Explore:

- Can you find any buildings with dates on?
- Explore Wylde Green. Take photos or make drawings of interesting buildings.
- Investigate the different types of houses in our area – which is the most expensive? Which is the cheapest?
